[Financial technology - Wikipedia](#)

Financial technology—FinTech for short— describes the evolving intersection of financial services and technology. The term can refer to startups, technology companies, or even legacy providers. The lines are blurring, and it's getting harder to know where technology ends and financial services begin. The term FinTech is often tossed around in the media and in casual conversation. And ...

[Fintech Books - Goodreads](#)

Fintech is not a new industry, it's just one that has evolved very quickly. Technology has, to some degree, always been part of the financial world, whether it's the introduction of credit cards in the 1950s or ATMs, electronic trading floors, personal finance apps and high-frequency trading in the decades that followed.
